Nguyên nhân

Do chưa cài đặt môi trường SSL và Java

Giải pháp

OpenSSL not found

1. Download and install OpenSSL.

[Win32/Win64 OpenSSL Installer for Windows - Shining Light Productions](#)

Win32 OpenSSL v#. #. # (not Light)

OR Win64 OpenSSL v#. #. # (not Light)

2. Add the OpenSSL directory to your path.

Go to: **Control Panel** → **System** → **Advanced system settings** → **Environment Variables**

Select the Variable **Path** in the "System variables" window and click Edit.

3. Add the path to your OpenSSL bin folder to the end of the "Variable value" text. e.g. I added **C:\Program Files\OpenSSL-Win64\bin** to the end of the value text.

- Take note, do not forget to add semi-colon ; before the 
4. Restart computer.
